

MVC4560 Miniature Vehicle Camera

Camera for Situational Awareness Systems

The Miniature Vehicle Camera (MVC4560) has been designed primarily for vehicle mounted close-in situational awareness work. However, the MVC is a versatile, inconspicuous unit with many other possible uses, including covert surveillance applications.

- The MVC measures a mere 100mm x 50mm x 50mm and weighs only 0.25Kg
- The Housing contains EMC filtering to allow the unit to meet the stringent EMC requirements required on military vehicles and a heater for low temperature use
- The MVC4560 uses a CCD sensor board camera.
- The colour version has 1 lux sensitivity at F1.4 and 520 line resolution
- Lens options from 45° to 60° Field of View available
- Based on similar fielded designs, the unit is designed to meet MIL STD 461F, 464 and 810F

FEATURES

- 100mm x 50mm x 50mm
- 0.25kg weight
- EMC Filter
- FoV 45° to 60°
- 10.8 to 13V input
- Mirror Mode (jumper selectable)
- Designed to meet MIL-STD-461F, MIL-STD-464 and MIL-STD-810F
